

Jericho Jacolo

Senior Software Engineer

jeejayjacolo@gmail.com • linkedin.com/in/jericho-jacolo • Davao del Sur, Davao Region, Philippines

Summary

Senior Software Engineer experienced in building web applications, backend systems, APIs, and product features. Comfortable working across frontend and backend development, debugging, performance improvement, and software delivery. Experienced in both engineering teams and freelance projects for different industries.

Skills

Frontend: TypeScript, JavaScript, React, HTML, CSS, Responsive Web Design

Backend: Python, FastAPI, Java, Spring Boot, REST APIs, Ruby on Rails, NestJS, Web Services

Development: API Integration, Debugging, Performance Optimization, Agile

Cloud & Database: AWS, Database Development, SQL

AI Project Technologies: LLM APIs, RAG, AI Agents, embeddings, vector search, prompt workflows

Target Stack: TypeScript, React, Python/FastAPI, Java/Spring Boot, PostgreSQL, AWS, Docker, Kubernetes

Experience

Evangelist Apps

Remote

Senior Software Engineer

08/2024 - Present

- Build web application features for client and product projects.
- Develop backend APIs and connect them with frontend applications.
- Fix application bugs and improve slow or complex features.
- Work with product teams to turn ideas into working software.
- Review existing code and make applications easier to maintain.
- Support testing and production releases.

Freelancer

Remote

Software Engineer

05/2020 - 08/2024

- Built web applications and product features for different clients.
- Worked on both frontend and backend development.
- Created APIs and connected applications with external services.
- Fixed bugs and improved application performance.
- Managed project priorities and delivered work directly to clients.
- Took projects from early ideas through development and delivery.

Titansoft Pte Ltd

Remote

Software Engineer

10/2018 - 05/2020

- Developed and maintained web application features.
- Worked on backend services and application APIs.
- Fixed production issues and improved application performance.
- Worked with engineers and product teams on software releases.
- Helped improve existing code and application reliability.
- Supported testing, debugging, and software delivery.

Education

Bachelor's Degree, Computer Science

National Taiwan University

09/2012 - 06/2016

Projects

Modern Full Stack Web Application

- Built a frontend using **React and TypeScript**.
- Created REST APIs using **Python and FastAPI**.
- Stored application data in **PostgreSQL**.
- Containerized services using **Docker**.
- Deployed application services on **AWS**.

Java Backend Service

- Created backend APIs using **Java and Spring Boot**.
- Connected services with a PostgreSQL database.
- Added API validation and error handling.
- Packaged the service with Docker.
- Prepared the application for deployment with Kubernetes.

Certification

Python Skill Certification

Oracle Certified Professional, Java EE 5 Web Services Developer (OCP)

AWS Certified Database – Specialty (DBS-C01)

SEO Certification
